MT SERIES

Patented Multi-Tub Design

by UltraMatic Equipment Company

The *New* MT SERIES (patent# 5803233) by UltraMatic is the most unique innovation in the vibratory finishing industry. The MT features up to five tubs ON ONE DRIVE enabling the user to run multiple processes e.g ; (deburr, wash, burnish, descale, and dry) all simultaneously!! The MT will run any media including heavy steel media yet is flexible enough to run 96" long aluminum aircraft parts with critical tolerances. The requirement to purchase several machines to keep different part types separated is gone. Now you can purchase one MT machine with five tubs for the price of one and minimize the moving parts (motors, belts, bearings, etc.) that are required with multiple machines. Increase productivity by adding our MT series to your finishing department.
